

tesseract_collision
/include/tesseract_collision
/bullet/tesseract_compound
_compound_collision_algorithm.h

```
graph BT; A["tesseract_collision  
/src/bullet/tesseract  
_collision_configuration.cpp"] --> C["tesseract_collision  
/include/tesseract_collision  
/bullet/tesseract_compound  
_compound_collision_algorithm.h"]; B["tesseract_collision  
/src/bullet/tesseract  
_compound_compound_collision  
_algorithm.cpp"] --> C;
```

The diagram illustrates the relationship between three files in the tesseract_collision library. At the top is a header file, tesseract_collision/include/tesseract_collision/bullet/tesseract_compound_compound_collision_algorithm.h, which is shaded gray. Below it are two source files: tesseract_collision/src/bullet/tesseract_collision_configuration.cpp on the left and tesseract_collision/src/bullet/tesseract_compound_compound_collision_algorithm.cpp on the right. Both source files have blue arrows pointing up to the header file, indicating that they include or depend on it.

tesseract_collision
/src/bullet/tesseract
_collision_configuration.cpp

tesseract_collision
/src/bullet/tesseract
_compound_compound_collision
_algorithm.cpp
